

**DanCad Engineering A/S**  
**Specialized in Outsourced Product Development and Innovation**

Welcome to our world of Industrial Design & Product Development

---

Dancad is a Danish company specialized in industrial design, product innovation and mechanical construction. Dancad was founded in 1995 and today we are proud to have some of the finest industrial companies in Denmark among our customers. We serve our customers and add value to their business development by supplying special engineering competences, new inspiration, extra brainpower capacity for product development and project team management.

Over the years we have spent thousands of hours in the service of our customers and in 2006 we managed to produce close to 11.000 hours of product development engineering.

We are located in the historical royal city of Hillerød just 30 minutes from the centre of Copenhagen.

**New Strength to the Commercial Basis of your Company**

The work with product development outsourced to us from industrial company customers transforms into a strengthened commercial basis and renewed earning power for these companies. We provide a well structured basis on which your inspired idea, your needs for improvements or the next product generation will find its way to reality.

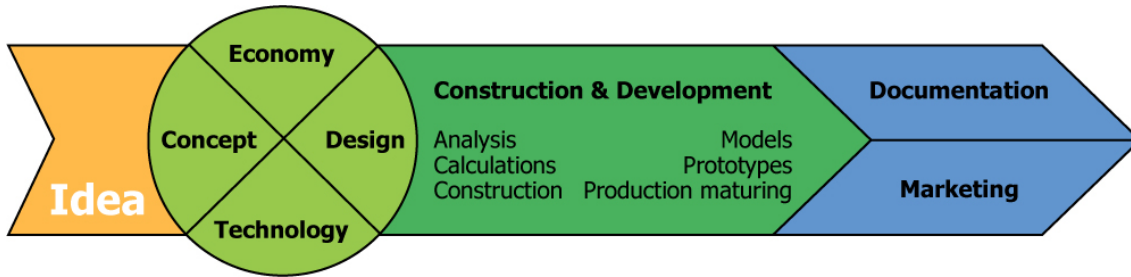

**Human Capacity and a Will to Win**  
**– Basis for our Results**

Every person in our team is a highly educated and specialised engineer, technician, industrial designer or graphical designer. This educational foundation is supplemented with a solid professional experience and expertise in the fields of mechanic construction, integrated design and production. Through our close and cross-functional cooperation and teamwork we ensure that our customer receives durable solutions.

We span a brought range of disciplines and solve jobs as part of a project as well as taking full responsibility for the entire process of product development.

## Product Development - From Idea to Completed Solution

We work with product development in a very intense and structured process involving a variety of professional subject competencies and tools. By close cooperation with our customers and between our selves we incorporate interdisciplinary experience combinations into the development process. Thus we constantly work with the strongest, most durable solution in mind compromising with neither quality nor accuracy.

When we design and innovate we keep in mind a high standard of user friendliness, technical durability and unique details of operation. We supply our customers with enhanced competitiveness and innovative products.

The results are long-term durable solutions.

### Customer References

Among our customer base are a number of Danish companies also dominant in the international business arena and with worldwide operations. Some of these may be familiar to you.

<b>Ametek Denmark</b>	<b>JAI</b>
<b>Danfoss</b>	<b>Keofitt</b>
<b>FOSS</b>	<b>LINAK</b>
<b>Fritz Hansen</b>	<b>Novo Nordisk</b>
<b>GN Netcom</b>	<b>Radiometer</b>
<b>GN ReSound</b>	<b>XO Care</b>

### Online Project Management

We handle project management through our online database DC Manager to which our customers can log in. With DC Manager we provide online and up to date information about activities in the project, an overview of progress made, upload and share files and project information. The financial aspects of the project are also available and the system provides for accurate and detailed invoicing of our work.

You as a customer, as well as our product development engineers can access the system through any pc with an Internet connection.
